

K2 MINI

The Sunmi K2 mini POS system works with the fast Qualcomm Snapdragon processor with eight cores. The flexible kiosk system can be wall-mounted (265 x 120 x 680 mm) or used as a standard desktop cash register (300 x 250 x 590 mm). When the unit is on the table, an additional touch screen is optionally available for staff. If you plan to set up a self-service system at a later date, the SUNMI K2 mini also works as a powerful standard POS system.
