

Q260

The QubePos Q260 Thermal Receipt Printer is used mainly in a commercial environment such as shops, warehouses, and various retail services. The Q260 offers both a USB and RS-232 connection that works with most PC-based POS systems. The printing speed of up to 260 mm/s reduces waiting time even for long receipts. After the receipt has been printed, the auto cutter automatically cuts it off.
